

Good Afternoon,

In efforts to keep residents up to date on the status of both the indoor and outdoor pools/spas- we are still working on the repair of the indoor pool air temperature. This repair should be completed tomorrow, Thursday July 28th. As soon as the repair is made we will reassess the temperature inside the pool area and determine the best course of action to re-open the pool/spa- I am hopeful to have the indoor pool re-opened tomorrow immediately after the repair and am pushing for that- if not, no later than Friday. The outdoor pool remains open and we are in the final stages of the outdoor spa repair and expect that to be opened by the weekend as well.

I appreciate your patience behind these repairs/adjustments as the board/facilities committee have been working around the clock to get this rectified.

Thank you,

Stefany Durland
